

# USPS Pricing Engine Web Services

---

September 23, 2019

## Summary

This is the Pricing Engine SDK (version 11.7.6.0) for the September 27, 2019 Release. The following is a list of enhancements included in this release.

## Defect - The Dimension Text for GXG to Country 10032 is incorrect

### Summary

The dimension text for the GXG product going to Country 10032 was missing the max length and width.

### Changes

Updated database to correct the issue.

## Defect - UPUXIT L+G and L+W+H are not being returned

### Summary

The Length + Girth and Length + Width + Height supplied by the UPUXIT Web Service was not being parsed correctly by the Rate Engine code.

### Changes

Updated code to correctly parse the data

## Impact on Existing Applications

You should rebuild your application since the WSDL has changed.
